Welcome to Howe Gardens

We take great pleasure in again sending you our catalog of many fine daylilies and irises.

Our list is not long, for stock of many of the newest varieties is still too small for cataloging.

Local customers will, as usual, have a choice from many varieties not listed here.

You may have much beauty in your garden "from spring 'til frost" with

the right selection of varieties and any help needed, will gladly be given, for we want you to be pleased. We promise to send you only strong blooming size plants.

Peak bloom for Iris should be around the first week in June, with the best bloom in daylilies coming in July, though some will be in bloom from Iris time, until the first heavy frost.

O. R. HOWE, JR.

Daylilies

Hemerocallis (Daylilies), are the most satisfactory perennial for continuous bloom in your garden, "from spring 'til frost."

With a good selection of varieties, you may have much beauty in your garden, no matter what soil or climatic conditions you have.

Daylilies, now in clear shades of yellow, pink, rose, purple, red and orange; and with the beautiful bi-colors and banded patterns, are a big improvement on the old "Lemon Lily" and "Roadside Lily," of grandmother's day.

Our's is a trial garden; with new varieties added as they are introduced; and as stock permits, the "cream of the crop" are catalogued.

If there is any variety that you want, and it is not listed, please write; for we may have a plant to spare.

While Daylilies are easy to grow, always remember, a choice Daylily, like any other fine flower, deserves and appreciates good care.

Spring is an excellent time for planting. We ship plants in April and May; also in August, September, and the first part of October.
